

ELECTRIC CONTACT PRESSURE GAUGE

(5140-E60 / 5140-E100 / 5140-E250 / 5140-E315)

- No configuration required (“plug and play”).
- Direct reading analogue display.
- Measures pressure at 0 to 400 bars.
- For gaseous and corrosive substances.
- S3 security instrument according to EN 837-1.
- Nominal diameter of 40 mm.
- High resistance polycarbonate cover.

Devices that are reliable and simple to use, that allow for visual inspection at all times while continuously controlling the pressure inside the cylinder. If it is low, it sends an alert signal to the fire panel.

Its double control mechanism, with visual and electrical regulation, makes it suitable for controlling leaks or undetected discharge.
